CARES Airplane Safety Harness

The Easy Way for Kids to Fly Safely

Parents want their children to be as safe as possible when flying but without the frustration of lugging heavy, bulky, car seats through busy airports. Kids Fly Safe CARES® Airplane Safety Harness is the simple solution. CARES® Airplane Safety Harness is the only FAA approved harness-type child restraint that gives you peace of mind for the entire flight - during taxi and takeoff, turbulence, and landing.

Designed specifically for toddlers 22-44 lb. - these kids are old enough to sit in their own seats, but too small for the seat belt alone to adequately protect them during air travel.

CARES® works in conjunction with the regular airplane lap belt, to support and secure the child's upper body. CARES® is compact, light-weight, and is quick and simple to set up.

Since the child is comfortably secured, it helps prevent them from slipping out of or around in their seats. The child is more likely to stay seated and can't kick the seat in front of them – a bonus for fellow travelers!

Features:

- FAA Approved
- Convenient
- Portable
- Easy Installation
- Well-designed Belt and Buckle device
- Ensures Child Safety and Comfort
- Same Level of Safety as a Car Seat
- Use for Taxi, Takeoff, Turbulence, Landing
